COMPANY MINING ON CLAIMS OWNED BY DASTRUP

Dear Mr. Dastrup:

Aggra-Insulite has filed a notice to conduct mining related operations on your claim, MM #35 (UMC 249739) in T. 25 S., R. 4 W., Section 30, SW1/4. This notice has been accepted and assigned case file number UT056-90-6N by this office. You are reminded that under 43 CFR Surface Management Regulations the claimant bears ultimate responsibility for surface reclamation for lands disturbed by mining related operations.

A copy of the acceptance letter sent to the operator is attached. Please pay particular attention to the BLM's opinion that the material is a common variety, which requires that the mineral be bought under the 1947 Materials Act rather than located under the Mining Laws.

Also, Bureau of Land Management records indicate an incorrect address for DTM Minerals. If you have not already done so, then you should correct your address of record with the BLM State Office. The address is:

Bureau of Land Management
Utah State Office
P.O. Box 45155
Salt Lake City, Utah 84145-0155

If you have any questions, please contact Michael Jackson at (801) 896-8221. Thank you for your effort in proper management of the public lands.

Sincerely,

J. Rodrick Kister
Area Manager

COMPANY MINING ON CLAIMS OWNED BY COMPANY

RE: Mining notices UT056-90-6N and UT058-89-4N

Dear Mr. Park:

Your notice to conduct mining related operations on your claim, MM #35 (UMC 249739), in T. 25 S., R. 4 W., Section 30, SW1/4, has been received and accepted by this office. Your notice has been assigned a new case file number UT056-90-6N, and your old case file, UT-058-89-4N, has been updated to this new file. You are requested to reference UT056-90-6N in any future correspondence about this notice.

If you change your operation from what is described in your notice, please contact this office prior to the change. If your operations extend for more than one year, please advise this office of the status of your mining related activity on the anniversary date of your notice.

A copy of your notice will be forwarded to the Utah Division of Oil, Gas and Mining (DOGM); thus, you will not have to file this notice with DOGM. However, reclamation under this notice is required to conform to standards of the Utah Mined Land Reclamation Act. Also, all mining claimants and operators that plan to use, store, or divert water are required by Utah statute to notify the Utah Department of Water Resources at:

1636 West North Temple
Salt Lake City, Utah 84180-1203

As required by 43 CFR 3809 Surface Management Regulations, reasonable measures must be taken to prevent unnecessary or undue degradation of public lands during your operations. Please notify this office upon completion of operations and reclamation, so an inspection may be conducted on the site. The Bureau of Land Management will conduct surface management inspections periodically.

You are advised that the Bureau of Land Management is of the opinion that the subject mineral material does not possess a unique property giving the deposit special and distinct value. Therefore, this mineral material is considered a

common variety that is not subject to location under the mining laws. You are further advised that if a final determination by the Department of Interior is made that this material is, in fact, a common variety, then you could be responsible to the United States for the value of this material, damage to the land, and administrative costs for recovering such compensation. Acceptance of your notice will not now, nor in the future, serve as determination of the validity nor ownership of any mining claim included under your notice.

The Bureau of Land Management may examine the subject mining claims and subject mineral material to prepare a formal report. The purpose of the examination and report is to determine whether the mineral material is a common variety, which is a salable mineral, or an uncommon variety, which is a locatable mineral. If the subject mineral material is determined to be a common variety, then a contest complaint will be issued.

In our previous letter, you were requested to submit a record of production. Your cooperation is requested. As discussed with you at our meeting in June, you were advised that establishing a special and distinct value for this deposit is required to prove an uncommon variety.

Thank you for submitting your notice. If you have any questions, please contact Michael Jackson at (801) 896-8221.

Sincerely,

Area Manager
